_____

Junior Developer

An aspiring student at 1150 Academy developing experience in website development, front-end and server-side, database development, application development, and security. I am passionate about developing my skills as a programmer and strive to know how information flows through applications. I am a great team player and am more than willing to work in a group. I am goal oriented and look to help others when they struggle.

Skills

- Languages: Javascript, CSS,HTML
- Frameworks/Libraries: React, Angular, Bootstrap
- Software Stack: MEAN, MERN
- Databases: SQL(Postgres), MongoDB
- Build Technologies: Grunt, Gulp, Bower
